Libya Pro Tech

LIBYA PRO TECH · EGYPT PRO ORSPRA

We build your system, then bring in the clients.

A programming and digital marketing company. We build complete operational systems — finance, auctions, logistics, stores, applications — currently operating in Libya, Egypt, Turkey, Ireland, and the United States, then market them with ad campaigns, AI-powered video, and designs that sell.

WHO WE ARE

A team that builds and markets your product — not a reseller of templates.

Libya Pro Tech is a branch of the EGYPT PRO ORSPRA group. We design, develop, and operate digital systems for businesses — from database to Arabic interface — then launch their marketing campaigns and track every client from their specific ad. Every system in this profile was built by us and can be demonstrated live on screen in a single meeting.

17	5	6	100%
systems available for live demo	countries where our systems operate	integrated auction sources	Arabic-first · Native RTL

Financial Systems

Transfers, multi-currency vaults and wallets, supplier settlements, receipt vouchers, and commission accounting with monthly reports.

Operational Platforms

Stage tracking, container and shipping management, inventory and invoicing, and multiple roles with precise permissions for each user.

Applied Artificial Intelligence

Price estimation, work agents, and content creation — integrated into the workflow, not as a cosmetic add-on.

Ad Campaigns

Facebook, Instagram, and Google, and click-to-WhatsApp ads with a unique code for each ad — so we know which ad brought which client.

AI Video

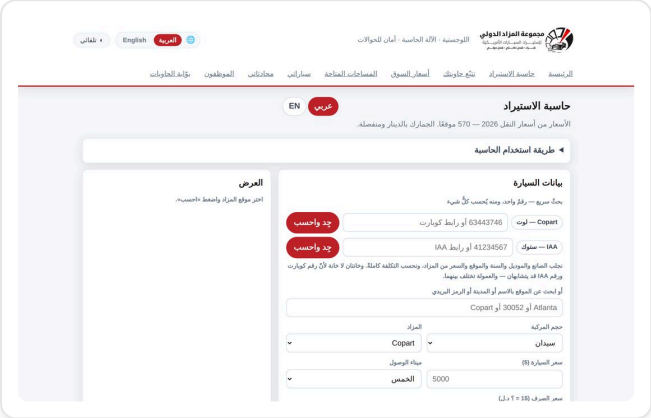

Short ads with consistent characters and Libyan dialect, and explanatory videos with Arabic and English voiceovers.

Posters and Visual Identity

Square and vertical ads, posts, animated logo, and account and group images.

SELECTED WORK

Real screenshots from live systems.

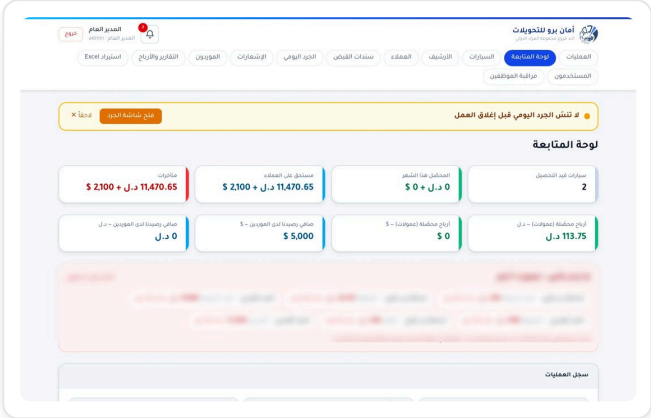

Import Calculator

LOGISTICS

Final import cost before purchase: auction commission, inland transport, sea freight, and customs in LYD — from a single lot number.

NEXT.JS 16 · PRISMA · POSTGRESQL

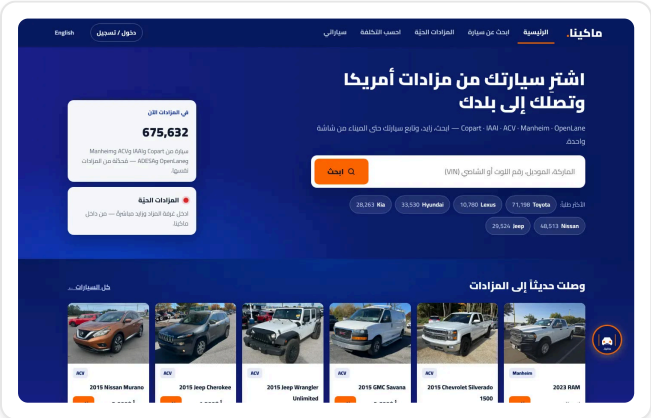

AmanPro for Collections

FINANCE

A dashboard with receivables, collector performance, and profits, receipt vouchers, daily inventory, printable monthly reports, and automated delay alerts.

NEXT.JS 16 · PRISMA · SQLITE · RBAC

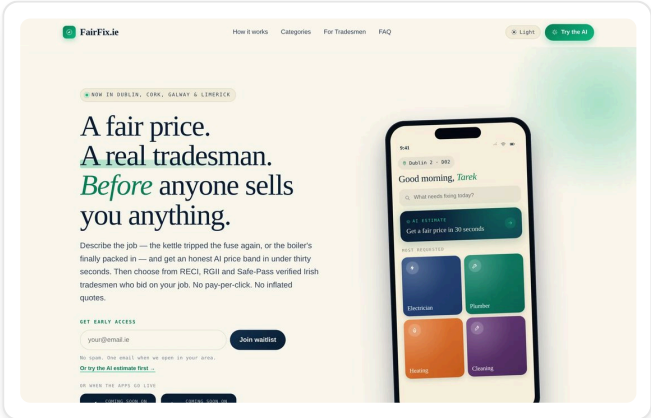

Macchina MACCHINAA

AUCTIONS

New release: Over **670,000** cars from six US auctions on one screen, automatic bidding up to a customer-defined limit, vehicle history report, and daily auction results.

MACCHINAA.NET · DJANGO · REALTIME BIDDING

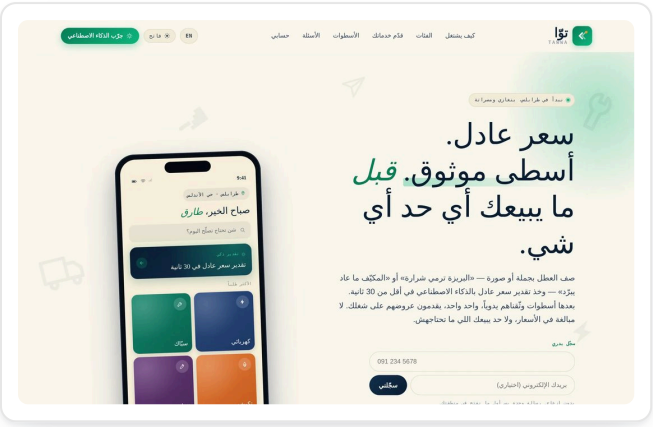

FAIRFIX.IE

MARKETPLACE

An Irish English version of the fair pricing model — proof of our ability to compete in the European market with the same platform.

NEXT.JS 14 · AI ESTIMATION · I18N

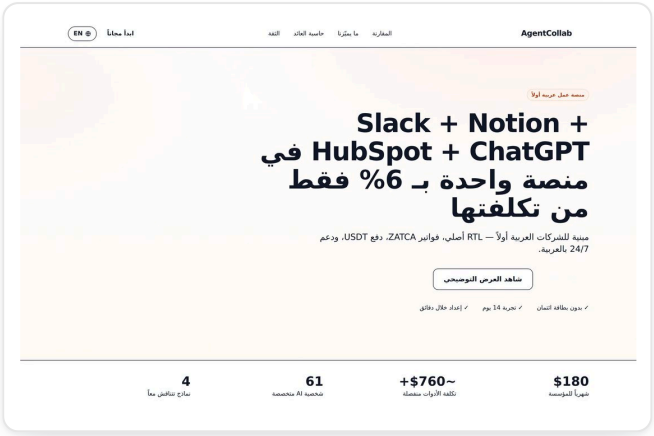

Tawwa — TAWWA

MARKETPLACE

The client describes the fault with a sentence or image, and receives a fair AI-powered price estimate within seconds, then offers from verified technicians.

NEXT.JS 14 · TYPESCRIPT · AI ESTIMATION

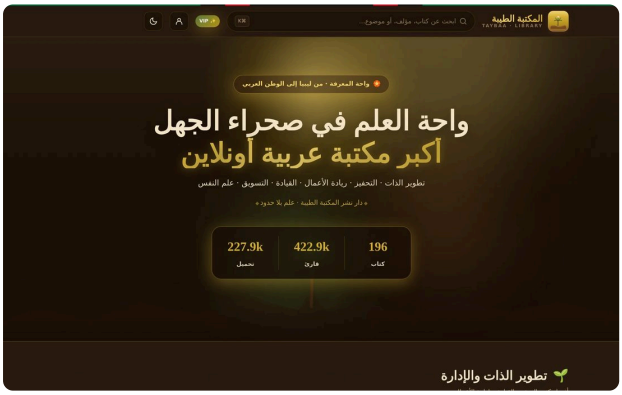

AGENTCOLLAB

AI

A unified alternative to four separate tools: chat, tasks, CRM, and AI agents — with ZATCA invoices and an Arabic interface.

AI AGENTS · RTL · MULTI-TENANT

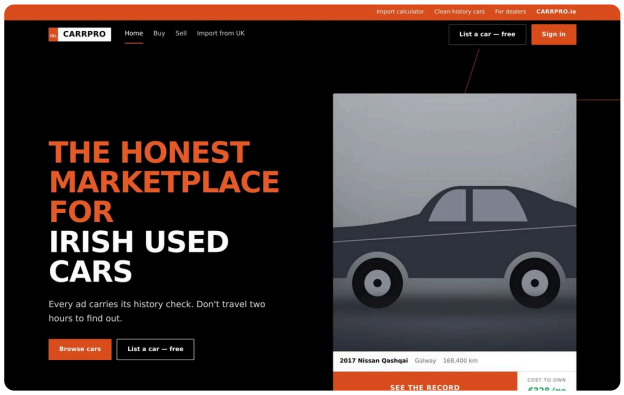

Taybaa Library

COMMERCE

A digital Arabic library: book catalog, in-browser reader, premium subscription, and a publishing control panel.

READER · SUBSCRIPTIONS · ADMIN

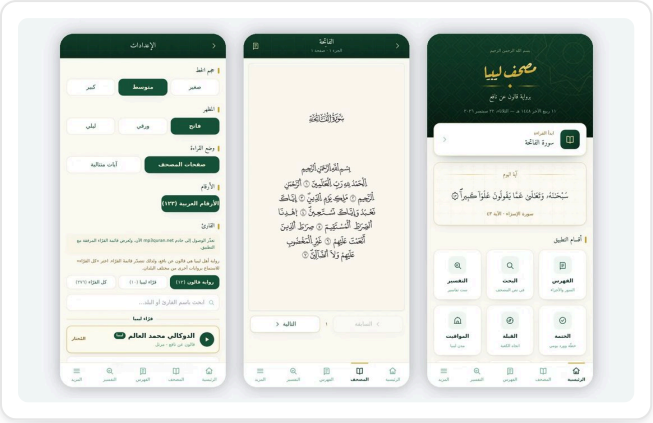

CARRPRO.IE

COMMERCE

An Irish car market: vehicle history check for each ad, monthly ownership cost calculator, and an import calculator with final cost after taxes.

DJANGO 5 · POSTGRESQL · VRT / WLTP

The full gallery — 17 systems with real screenshots and live demos — is available on the website.

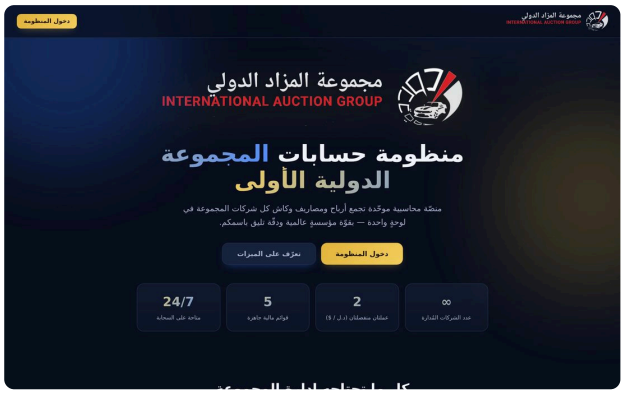

Mushaf Libya

APP

A Mushaf with Qalun recitation from Nafi' in King Fahd Complex script, six interpretations, search in 6214 verses, Libyan reciters, Khatmah (completion) feature, Libyan city prayer times and Qibla — and works offline.

MUSHAF-LIBYA.COM · NEXT.JS 15 · PWA

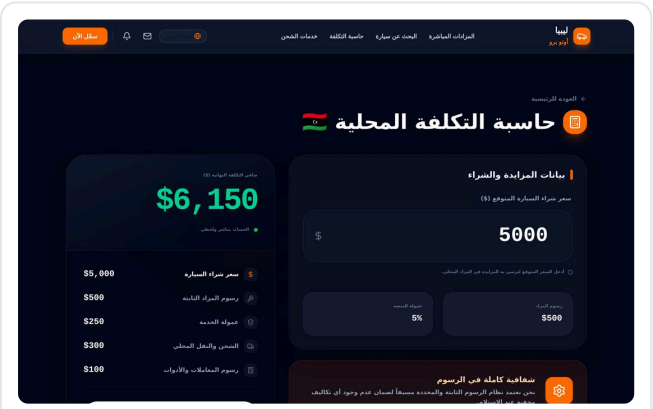

Group Accounting System

FINANCE

Unified multi-company accounting in two currencies: income statement, balance sheet, cash flows, and Libyan tax report, with AI-powered invoice reading.

CLOUDFLARE WORKERS · D1

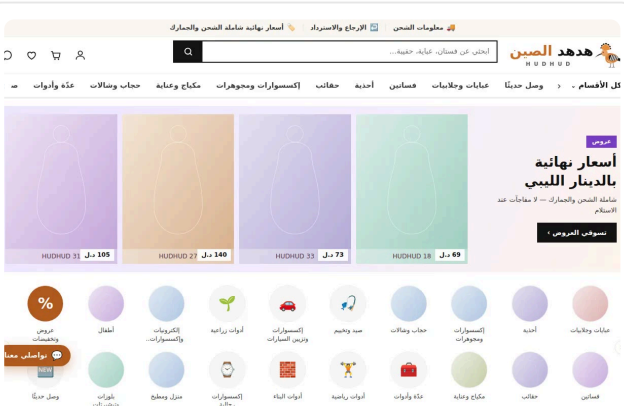

AutoPro AUTOPRO

AUCTIONS

Live car auctions with a real-time counter, offers market and wallet, and a local cost calculator showing the net final cost with all fees, with shipping to Libya.

REACT 19 · NESTJS · SOCKET.IO

HUDHUDE HUDHUDE

COMMERCE

A store for the Libyan market with over 11,000 products from Chinese factories, at a final price in LYD, including shipping and customs, with pickup from Tripoli or Benghazi.

HUDHUDE.COM · CLOUDFLARE WORKERS · D1

Also: **Ajrly** — an operating system for real estate rentals, and **Ads Studio** — AI-powered video ad production.

DIGITAL MARKETING

Campaigns that drive clients, not just likes.

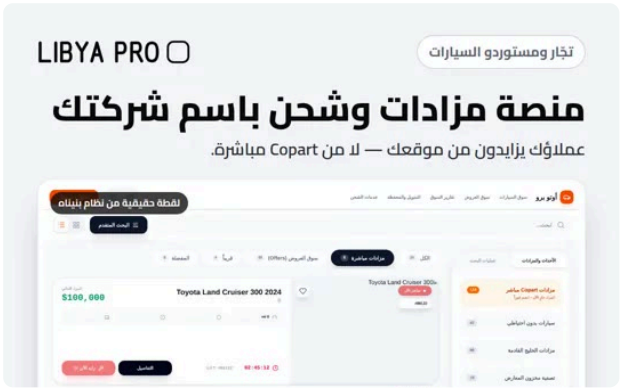

AI Video

VIDEO

The "Hajj Khalifa" series for AutoPro auctions: six episodes featuring two recurring Libyan characters, a script in Libyan dialect, and integrated subtitles.

9:16 · REELS · STORIES

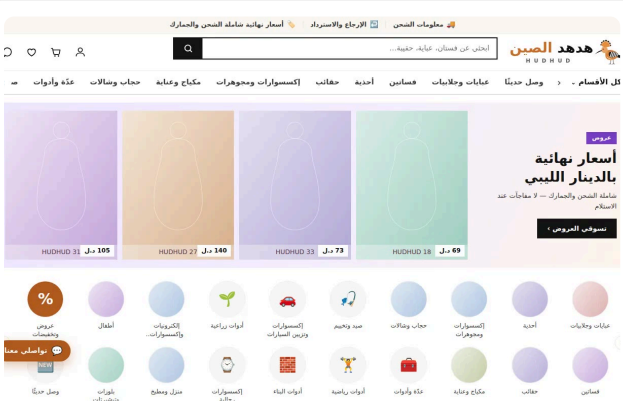

Sector-specific campaigns

ADS

Ready-to-launch campaigns for four sectors: square and vertical images with authentic shots, two distinct texts per campaign, and a unique code for each ad within WhatsApp messages.

META · CLICK-TO-WHATSAPP

Explainer Video with Voiceover

EXPLAINER

A guided tour of each of our products, featuring authentic footage, with both Arabic voiceover and an English version — showcased on our website.

ARABIC · ENGLISH

Posters and Branding

DESIGN

Posts and promotions, Facebook and WhatsApp profile and cover photos, and internal team group images.

FACEBOOK · WHATSAPP · INSTAGRAM

SECURITY & METHOD

An organization doesn't buy promises — it invests in documented controls.

Role-Based Permissions

Each user views only relevant information, and every sensitive operation requires role verification prior to execution.

Audit Trail

Who did what, and when — an immutable log for all financial and administrative operations.

Data Within Your Domain

We host on your server or private cloud upon request, complete with periodic backups and tested recovery protocols.

Source Code Delivery

The complete code is delivered to the client with full documentation — ensuring no vendor lock-in.

Our Process

01 **Diagnostic Session**
We collaborate with your operations team to map current workflows and pinpoint areas of inefficiency and delay, all before writing a single line of code.

02 **Working Prototype in Weeks**
No lengthy presentations — just a functional version operating on your data, ready for your team to test firsthand.

03 **Phased Implementation**
We integrate department by department, running in parallel with your legacy system until full stability is achieved, then decommission the old system.

04 **Training and Ongoing Support**
Comprehensive team training, an Arabic user manual, and continuous post-launch support.

SECTORS

Three key sectors, supported by two dedicated departments.

Banks & Financial Institutions

Transfers, multi-currency treasuries, commission settlement and accounting, and a comprehensive audit trail. We currently operate two financial platforms across four countries.

Government Entities

Tracking, control, and licensing systems with an Arabic interface, hosted within your domain, and with their complete source code delivered to your entity.

Companies and Stores

Sales, inventory, and invoicing systems, alongside e-commerce stores and marketplaces featuring cost calculators and advanced search capabilities.

Let's begin with a complimentary, no-obligation analysis session.

We'll demonstrate any of our systems live on screen, providing an initial estimate of scope and timeline.
